Project Name: IOT Based Smart Crop Protection System for Agriculture

S.NO	AUTHORS	TITLE	DESCRIPTION	PUBLISHED
				YEAR
1	T. Sandeep, B.	Crop Protection	Crop vandalism by wild animals and fire has	2022
	Manushree, S.	From Animals	evolved into a serious societal issue in recent	
	Rahul, T.	Using Cnn	years. It demands immediate attention because	
	Bharath		there is currently no viable answer to this	
			problem. As a result, this initiative has a lot of	
			societal significance because it tries to solve a	
			problem. This initiative will assist farmers in	
			securing their orchards and fields, preventing	
			them from incurring large financial losses and	
			saving them from the time and effort required	
			to preserve their properties. This will also	
			assist them in generating higher agricultural	
			yields, which would improve their financial	
			situation. By recognising the picture, an	
			ultrasonic sensor may be triggered to drive the	
			animal away. This approach is non-lethal to	
			animals and does not waste power.	
2	Shubo Wang 1	Development	The intelligent pest detection kit serves plant	2022
	, Peng Qi ,	and Application	protection management through "sensing +	
	Wei Zhang	of an Intelligent	artificial intelligence" technology to realize the	

	and Xiongkui	Plant Protection	accurate collection and mobile monitoring of	
	Не	Monitoring	plant information and data. The equipment has	
		System	been loaded with more than 500 users in	
			Qinghai, Jiangxi, Anhui, Zhejiang, Shanxi, and	
			other places in China. The suite provides users	
			with tools and means for plant protection	
			image and microenvironment acquisition to	
			help users implement more-refined plant	
			protection management. Through artificial	
			intelligence to identify diseases and pests of	
			crops, the plant protection operation is easier,	
			more accurate, and more efficient, so anyone	
			can have a plant protection expert with him. At	
			this stage, this project only identifies the main	
			diseases and pests of wheat, corn, rice, and	
			other major field crops and continues to	
			increase the sample types to realize more crop	
			disease and pest monitoring, which is the	
			further research direction of intelligent	
			agricultural monitoring.	
3	Mohit Korche	Smart Crop	The problem of crop vandalization by wild	2021
	, Sarthak	Protection	animals and fire has become a major social	
	Tokse,	System	problem in current time. It requires urgent	
	Shubham		attention as no effective solution exists till date	
	Shirbhate,		for this problem. Thus, this project carries a	
	Vaibhav		great social relevance as it aims to address this	
	Thakre, S. P.		problem. This project will help farmers in	
	Jolhe		protecting their orchards and fields and save	
			them from significant financial losses and will	
			save them from the unproductive efforts that	
			they endure for the protection their fields. This	

			will also help them in achieving better crop	
			yields thus leading to their economic wellbeing	
4	Mukesh	Smart crop	The problem of crop canalization by wild	2020
	Mahajan,	protection	animals has become a major social problem in	
	Kiran Patil,	system from	current time. It requires urgent attention as no	
	Vishesh Geete	animals using	effective solution exists till date for this	
	, Prasad	PIC	problem. Thus this project carries a great	
	Kondhare		social relevance as it aims to address this	
			problem. This project will help farmers in	
			protecting their orchards and fields and save	
			them from significant financial losses and will	
			save them from the unproductive efforts that	
			they endure for the protection their fields. This	
			will also help them in achieving better crop	
			yields thus leading to their economic	
			wellbeing.
